

PARTHIBAN S

Senior Business Analyst | Agile Delivery | Stakeholder & Requirements Management
Parthibansekar23@gmail.com | 9677257600 | Chennai, Tamil Nadu | 12+ Years of Experience

PROFESSIONAL SUMMARY

Results-driven Senior Business Analyst with 12+ years of experience leading end-to-end business analysis activities across digital transformation, e-governance, and technology delivery projects. Proven ability to collaborate with diverse stakeholders to gather, analyse, and document requirements translating complex business needs into precise user stories, functional specifications, and acceptance criteria that development teams can act on. Proficient in Agile/Scrum methodologies with hands-on experience facilitating requirements workshops, sprint ceremonies, and stakeholder presentations. Strong track record of delivering successful projects by bridging business and technology teams, managing multiple competing priorities, and driving continuous process improvement. Recognised for analytical rigour, attention to detail, and the ability to build effective relationships at all organisational levels.

CORE COMPETENCIES

Requirements Elicitation & Analysis	Functional Specifications & Acceptance Criteria	Workshop & Meeting Facilitation	Stakeholder Engagement & Communication
Agile Backlog & Sprint Management	Cross-functional Team Collaboration	Process Improvement & Best Practices	Multi-Priority & Deadline Management
BRD / FRD / FSD	User Stories & Use Cases	Agile / Scrum / Kanban	SDLC (Waterfall)
Stakeholder Management	Process Flow (MS Visio)	UAT & QA Coordination	JIRA
Change Request Management	Data Flow Diagrams	MS Office Suite	SQL

INDUSTRY & DOMAIN EXPERTISE

- BFSI & FinTech Domain Knowledge - E-Governance & Public Sector Digital Platforms - Digital Onboarding & Identity Verification - Conversational AI & Chatbot Platforms - Self-Service & Omnichannel Application Delivery - Customer Due Diligence & Risk Categorisation - Data Privacy, Localisation & Record Retention - IT Recruitment & Talent Acquisition (6+ years)	- Compliance & Regulatory Workflow Design - Third-Party API & System Integration - Transaction Processing & Reconciliation Workflows - Customer Consent & Grievance Redressal Frameworks - Stakeholder Workshops & Requirements Elicitation - UAT Planning, Execution & Go-Live Sign-Off - Post-Launch Analytics & Continuous Improvement - Audit Trail, Record Retention & Reporting Standards

PROFESSIONAL EXPERIENCE

Assistant Project Manager | Sr. Business Analyst

Dec 2023 – Feb 2026

Tamil Nadu e-Governance Agency (TNeGA) · Chennai

- Led business analysis activities across multiple concurrent government digital transformation initiatives managing scope definition, stakeholder analysis, and end-to-end requirements lifecycle from elicitation to UAT sign-off.
- Facilitated stakeholder workshops, executive presentations, and project review meetings to gather requirements, present progress updates, and secure approvals ensuring alignment between business goals and project delivery milestones.
- Produced and maintained comprehensive project documentation including BRDs, FRDs, user stories, functional specifications, acceptance criteria, process flows, and sprint backlogs in alignment with Agile/Scrum and SDLC standards.

► eKYC Platform Regulatory Compliance & Implementation

- **Requirements Gathering:** Collaborated with business stakeholders and compliance teams to gather, analyse, and document detailed requirements for a digital identity verification platform translating regulatory mandates into developer-ready functional specifications and user stories.
- **Process Flows & Functional Specs:** Defined end-to-end process flows and functional specifications for multi-tier customer due diligence journeys (standard, simplified, and enhanced), mapping each workflow to acceptance criteria agreed with business and compliance stakeholders.
- **Compliance & Risk Requirements:** Worked closely with compliance and development teams to ensure anti-money laundering controls, risk screening logic, and suspicious activity escalation paths were accurately translated from business requirements into technical solutions.
- **Business Rules & Logic Design:** Designed and documented business rules for risk-based customer categorisation (Low / Medium / High), including automated re-verification triggers facilitating accurate technical implementation by the development team.
- **User Stories & Journey Documentation:** Authored detailed user stories and process flows for multiple onboarding modes (OTP-based, video-based, and offline verification), with clear acceptance criteria defining successful and failed journey scenarios.
- **Process Improvement:** Identified gaps in existing onboarding processes and contributed to best practice documentation for data handling, record retention, and audit trail requirements improving operational consistency and regulatory readiness.
- **UAT & Sign-Off:** Planned and coordinated UAT execution across multiple functional scenarios; facilitated communication between QA, business, and development teams to resolve defects and achieve full sign-off before go-live.

► Government Chatbot Conversational AI Platform

- Conducted stakeholder workshops to define chatbot scope, user journeys, and integration requirements with existing government portals.
- Developed detailed use cases, user stories, and conversational flow diagrams; collaborated with NLP and development teams on intent design and fallback handling.
- Ensured seamless system integration and performed post-launch metric analysis, recommending flow optimisations that improved resolution rates.

Business Analyst Banking Technology

May 2020 – Dec 2023

Rampup Techno Solutions · Chennai

- Managed business analysis activities as sole BA across the full requirements lifecycle leading elicitation sessions, authoring BRDs, FRDs, user stories, and acceptance criteria, managing the sprint backlog, and driving UAT while directly engaging with clients and the development team throughout delivery.
- Managed competing priorities across multiple concurrent change requests performing impact assessments, facilitating stakeholder communication, and obtaining approvals to ensure zero release conflicts.
- Developed workflow diagrams, data flow diagrams, and data model documentation in MS Visio to translate complex business rules into precise technical specifications, ensuring development teams could implement solutions accurately and efficiently.
- Facilitated monthly client review presentations and weekly Agile sprint ceremonies (planning, reviews, retrospectives, backlog refinement) serving as the communication bridge between business stakeholders and the project delivery team.

► WhatsApp Self-Service Bot Conversational Banking Automation

- **Project Scope & Requirements:** Led requirements gathering and scope definition for a WhatsApp-based self-service automation bot; collaborated with business stakeholders to analyse needs, document user stories, and define acceptance criteria for two core customer journeys instalment plan conversion and deposit renewal.
- **Functional Specifications:** Developed detailed functional specifications for the instalment plan conversion journey documenting consent capture, rate disclosure, cooling-off period, and grievance channel requirements as structured acceptance criteria for the development team.
- **Process Flow Design:** Mapped and documented the deposit renewal journey covering automated notification triggers, renewal mode selection, interest preference options, and confirmation flows translating business rules into actionable technical specifications.

- **Business Rules & Logic:** Worked closely with the development team to accurately translate high-value transaction monitoring rules, escalation paths, and audit logging requirements into the platform ensuring business intent was correctly implemented in the technical solution.
- **Security & Authentication Requirements:** Documented OTP step-up authentication requirements for high-value transactions, including session management, re-authentication thresholds, and multi-factor fallback flows ensuring functional specifications were complete and testable.
- **Data Governance & Process Improvement:** Identified gaps in existing data handling practices and contributed to best practice documentation for conversation data storage, retention schedules, and purge policies improving compliance consistency across the platform.
- **Instalment Conversion Flow:** Designed the end-to-end process flow Eligibility Check → Balance Fetch → Plan Selection → Rate & Fee Disclosure → Authentication → Booking Confirmation → Receipt with each step mapped to user stories and documented acceptance criteria.
- **Deposit Renewal Flow:** Designed the renewal journey process flow Maturity Notification (T-30/T-7) → Intent Capture → Mode Selection → Interest Option → OTP Confirmation → Updated Advice Delivery with acceptance criteria validated against business requirements at each stage.
- **Integration & UAT:** Facilitated communication between development, QA, and business stakeholders throughout API integration and testing phases; co-ordinated UAT across edge cases, exception scenarios, and timeout handling signing off on go-live readiness.
- **Process Improvement & Best Practices:** Analysed post-launch metrics success rates, drop-off points, and escalation frequency to identify improvement areas; submitted actionable recommendations that were adopted in the subsequent Agile release cycle, contributing to best practice development for the BA function.
